

## Chapter 36

### Nouns of the Third Declension Part 3 - Dative

**36.1** In this chapter we meet the Dative of the Third Declension.

The dative singular adds the iota which is typical of the dative singular in all declensions.

The dative plural is formed by adding  $-σι(v)$  to the stem. The **v** is moveable - it may be added or it may be absent.

If the stem ends in a guttural,  $\gamma, \kappa, \chi$  the  $-σιv$  combines to give  $-\xiiv$

If the stem ends in a labial,  $\beta, \pi, \phi$ , the  $-σιv$  combines to give  $-\psiiv$

If the stem ends in a dental,  $\delta, \theta, \tau$ , or  $-v$ , the stem combines to give  $-σιv$

Stems ending in  $-v\tau$  drop the  $-v\tau$

$-av\tau + -σιv = -aviv$        $-env\tau + -σιv = -eiviv$        $-ov\tau + -σιv = -ouviv$

Watch out for the  $-ouviv$  ending. We become so used to associating  $-ouviv$  with the Third Person plural of a verb, that we sometimes forget that it can be part of a Third Declension noun.

**36.2 The complete pattern for Third Declension Nouns is**
